FIBER PRODUCTS

INLINE FIBER PRODUCTS was established in 2005 with the vision of serving our customers to our best extent. With our in house Fiberglass Pultrusion, Injection moulding, Forging and finishing plant, we are a serious challenger company that is only interested in providing high quality products.

Our expertise is in R&D and launching new and innovative products for the international markets. All of our products comply with the EU, UKCA and ASTM standards which brings our clients the peace of mind they are looking for.

We have constantly been growing and have plans to move into our new 100000 sq feet Factory by the end of 2024. We are proud to say that our esteemed clients have been a great support in our rapid success.

Our Key focus is on the following principles set by our director :-

1. Research and development to constantly make our products better.
2. Lean Production Systems to ensure that our production is cost effective and competitive for the markets
3. Providing exclusivity to clients. We protect our clients by keeping their products exclusive to them.
4. Excellent supply chain - We work on ground with our suppliers to ensure that we are the most efficient company in the industry.

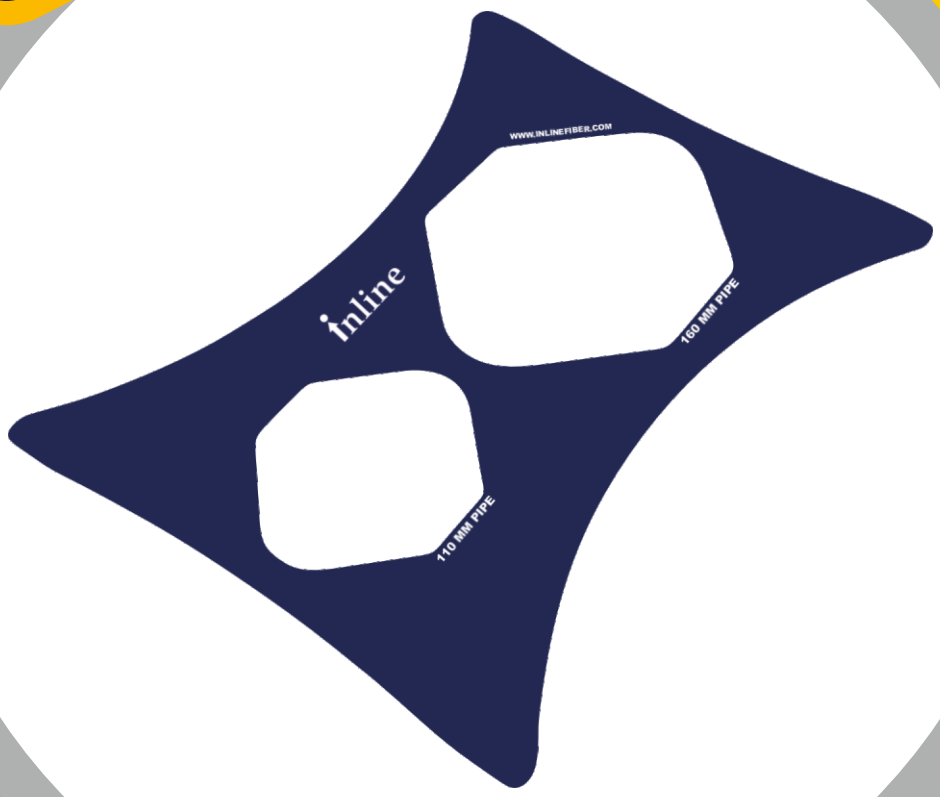

These principles have always given us an edge and is the biggest reason for our Rapid growth and presence in the market.
